

Document Imaging and Workflow

A Complete Solution to Manage Your Enterprise Content

Why KnowledgeLake?

KnowledgeLake is 100% focused on creating Enterprise Content Management products and solutions that extend the capabilities of Microsoft® SharePoint®.

To compete and thrive in today's highly competitive and regulated industries, organizations need effective ways to securely capture, exchange, and manage the information generated and contained in paper and electronic documents – and to do this in a cost effective, efficient way. KnowledgeLake provides an affordable, platform based solution for managing your company's unstructured content within SharePoint.

KnowledgeLake Enterprise Content Management (ECM) solutions enable organizations in any industry to standardize on SharePoint as a powerful content platform for building and deploying rich solutions, that satisfy many diverse business workloads. Most importantly, the KnowledgeLake solution is fully integrated with SharePoint; so it is easy to implement, easy to administer, presents low risk, and is cost effective.

Our Products

KnowledgeLake **Capture** for SharePoint

KnowledgeLake Capture is a single, comprehensive solution for managing the capture of your enterprise content using the Microsoft SharePoint platform.

Much more than a simple "Scan to SharePoint" application, KnowledgeLake acts as a single, manageable interface to drive the full feature set all of your scanning devices; including MFPs, production scanners, departmental scanners and desktop scanners.

- Powerful and flexible scanning
- Innovative advanced scanning features
- Automated Indexing
- High volume release to SharePoint
- Capture & index electronic documents
- Web-based capture and indexing
- MFP/Distributed Scanning
- Office 365 Ready

KnowledgeLake Connect enables users to save electronic content to  **KnowledgeLake** **Connect** for SharePoint on an ad-hoc basis - such as Office documents, PDF files, images and e-mail messages in a single step.

KnowledgeLake **Imaging** for SharePoint

KnowledgeLake Imaging is a scalable solution for searching, viewing, securing, annotating and routing your company's mission-critical content.

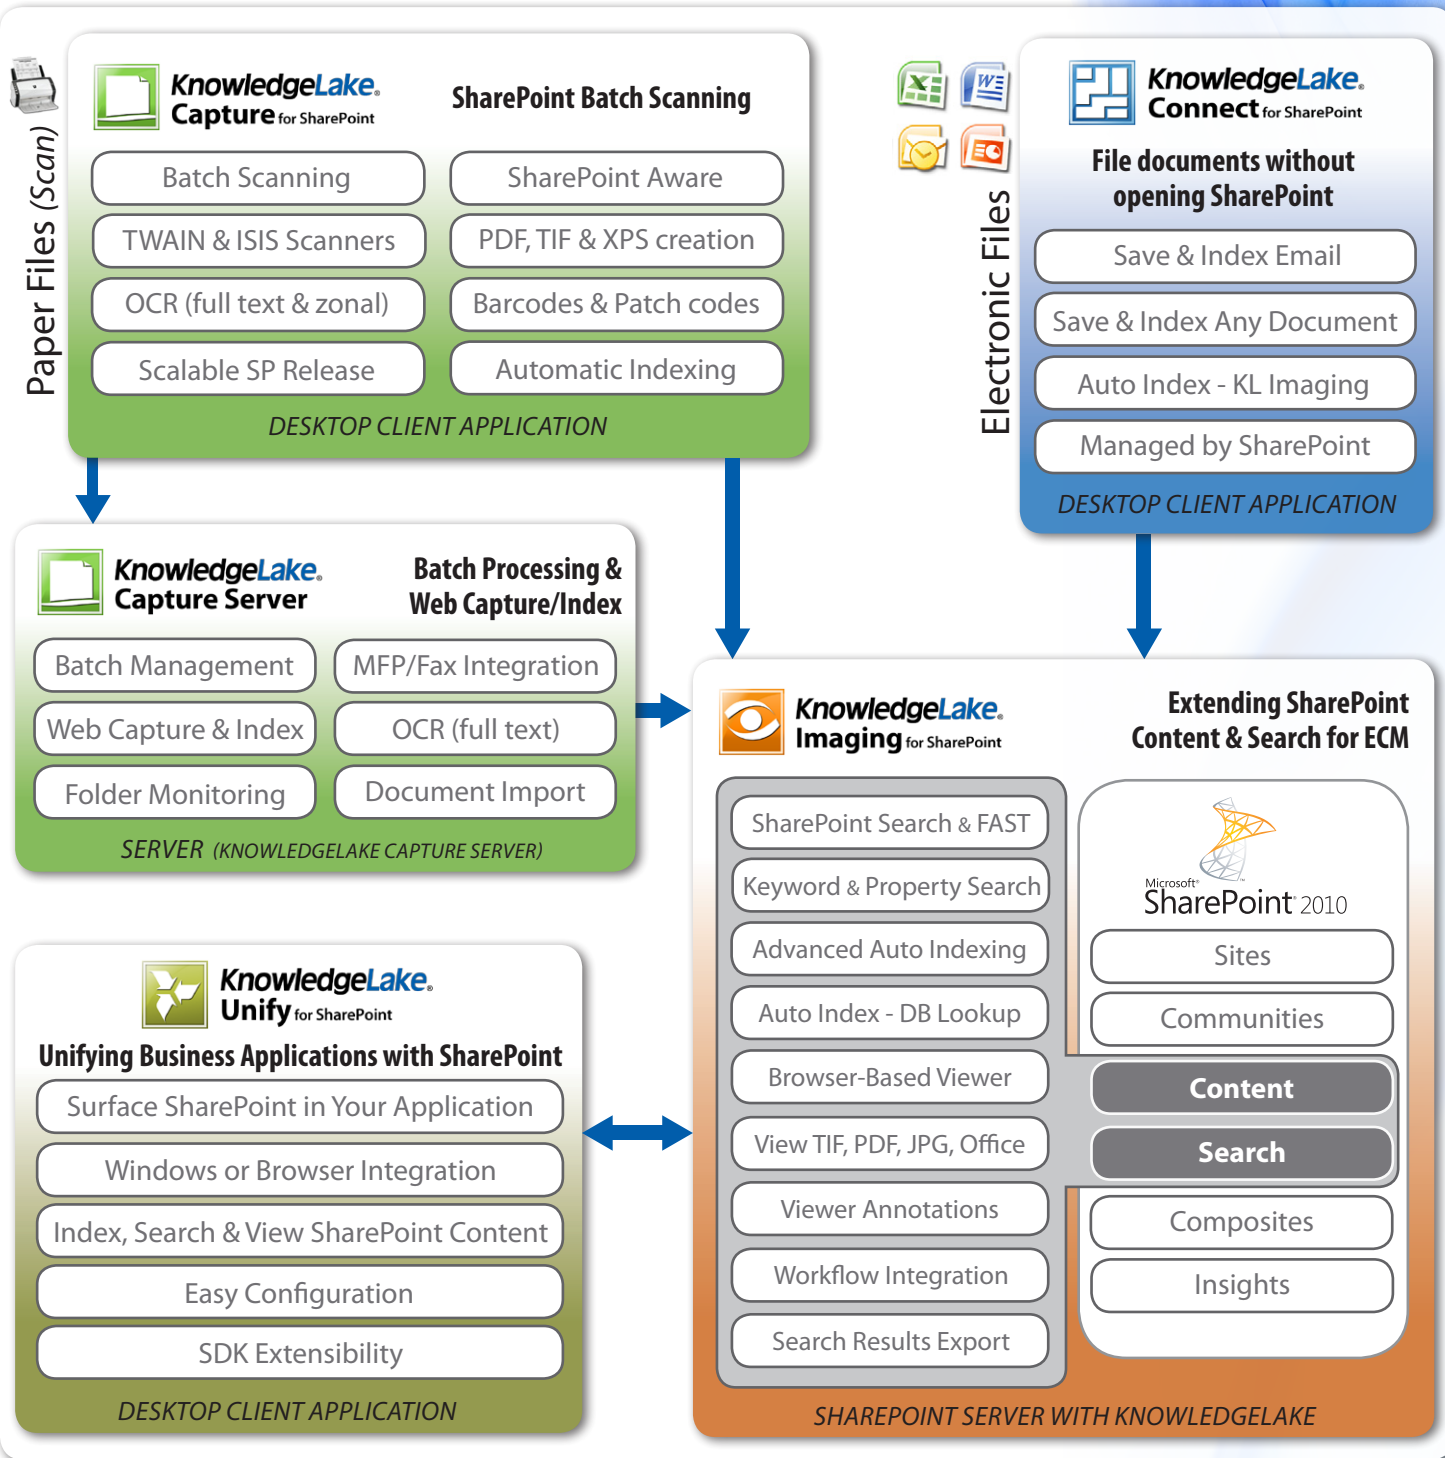

One of the greatest pain points for anyone in business today is the amount of time it takes for people to process the large amount of paper and electronic data they encounter every day, such as financial information, email messages, faxes, printed reports, and correspondence.

- Fast, relevant searches
- View & edit common document types from web browser
- Efficient indexing with content type connectivity to business applications
- Scan and index directly from SharePoint
- Export documents from SharePoint
- SDK for integration and customization

KnowledgeLake Unify surfaces SharePoint content to business  **KnowledgeLake** **Unify** for SharePoint applications to enable users to search, reference and archive documents in SharePoint without leaving familiar business applications.
