

Document Imaging and Workflow

Single solution to Manage Your Enterprise Content

Why KnowledgeLake?

KnowledgeLake is 100% focused on creating Enterprise Content Management products and solutions that extend the capabilities of Microsoft[®] SharePoint[®].

KnowledgeLake provides an affordable, platform based solution for managing your company's unstructured content right within SharePoint. More capable than even the more expensive legacy ECM applications, KnowledgeLake is an enterprise scalable and comprehensive SharePoint ECM solution for searching, viewing, securing, routing and annotating your company's mission critical electronic content. The KnowledgeLake solution is fully integrated with SharePoint, so it is easy to implement, easy to administer, presents low risk, and is cost effective.

Our Products

KnowledgeLake Capture for SharePoint

KnowledgeLake Capture is a single, comprehensive solution for managing the capture of your enterprise content using the Microsoft SharePoint platform. Much more than a simple "Scan to SharePoint" application, KnowledgeLake acts as a single, manageable interface. Drive the full feature set all of your scanning devices; including MFPs, production scanners, departmental scanners and desktop scanners, as well as electronic content.

KnowledgeLake Capture

KnowledgeLake Capture is a desktop application that that can easily scan a high volume of paper documents to SharePoint, so individuals can quickly access the content needed. KnowledgeLake Capture is scalable so it can work with desktop scanners to high volume production scanners.

KnowledgeLake Connect

KnowledgeLake Connect enables users to save content on an ad-hoc basis - such as Office documents, PDF files and email messages in a single step. All users in your organization can easily and accurately index documents from any desktop application, and then save these documents to a SharePoint document library.

KnowledgeLake Capture Server

KnowledgeLake Capture Server provides powerful server-based batch management capabilities. This solution provides an easy and cost-effective method to scan and save documents to SharePoint using office copiers, multi-function devices, fax servers and network scanners.

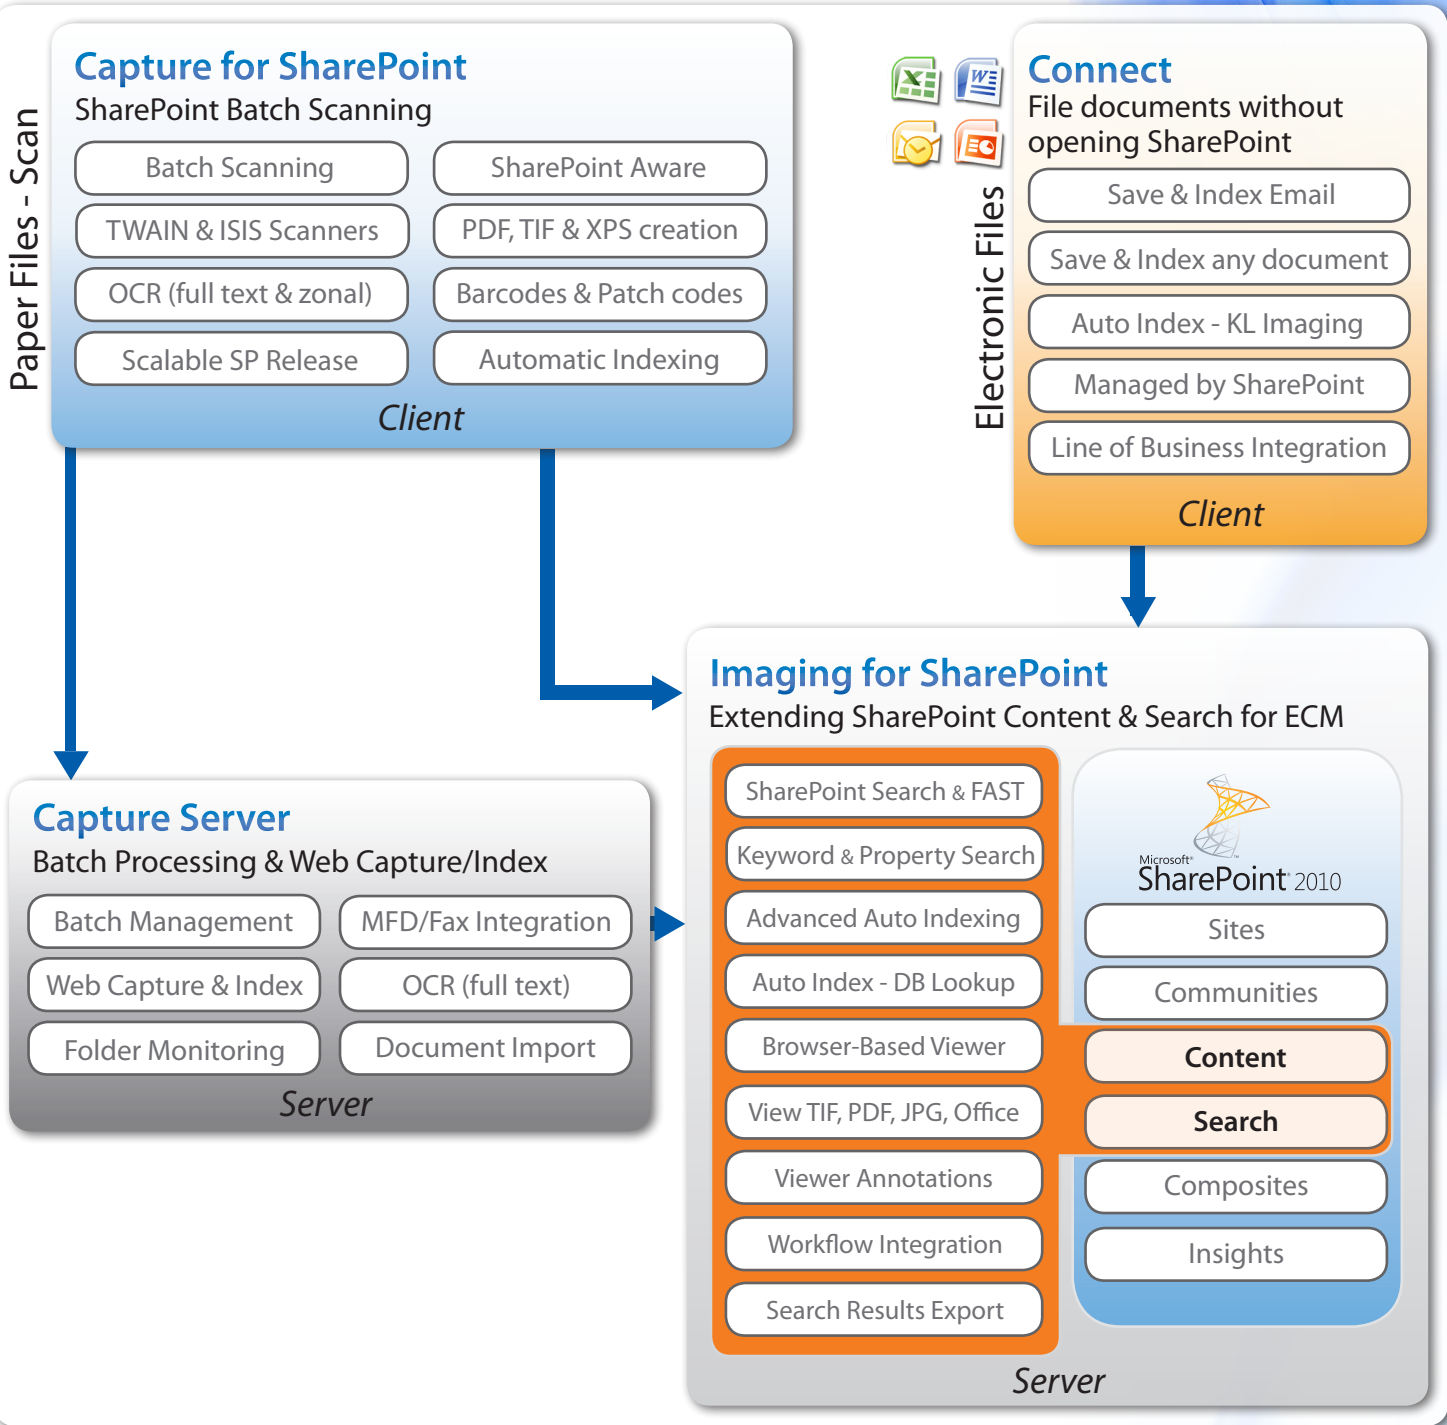

KnowledgeLake Imaging for SharePoint

One of the greatest pain points for anyone in business today is the amount of time it takes for people to process the large amount of paper and electronic data they encounter every day, such as financial information, email messages, faxes, printed reports, and correspondence.

Microsoft SharePoint provides a platform for addressing these needs through an integrated suite of server capabilities for enterprise search, content management, business process facilitation, simplified information sharing, and enhanced business insight. KnowledgeLake Imaging for SharePoint extends the SharePoint platform into a fully functional document imaging system. This solution enables organizations to utilize SharePoint as a Document Imaging solution, making it easier for users to organize, store, access and route millions of scanned documents and data across the enterprise.
