

# KnowledgeLake Imaging for SharePoint

## Extend Microsoft SharePoint for Enterprise Content Management

### INDEX **Configure content type connectivity with business applications to increase productivity and reduce manual errors**

- Enhance the built-in functionality of SharePoint Content Types with connections to business applications and databases for column validations, cascading lookups and other advanced auto-indexing features
- Take advantage of the Content Type Hub to provide KnowledgeLake Content Type Behavior Syndication across the entire SharePoint farm to aid in the delivery and governance of taxonomy
- Enhance the native SharePoint features such as managed metadata columns, Content Types, and BCS (Business Connectivity Services)
- Simplify the user experience while onboarding content by displaying only relevant SharePoint Content Types

### SCAN **Scan and index documents without ever leaving the SharePoint interface**

- Scan PDF, TIFF and XPS documents directly from SharePoint with a locally attached capture device
- View images and enter column properties inside your browser
- Use KnowledgeLake for validations, auto-index and drop-down pick lists before saving SharePoint properties
- Supports TWAIN scanners

### EXPORT **Export a collection of documents from SharePoint to an Administrator-configured File Share**

- Execute a search in SharePoint to drive the export list
- Export all results or selected items
- Exports contain either documents only, or documents and desired metadata
- Permissions-based access to Export Jobs

### SDK **Extend your KnowledgeLake solution with easy integration and customization for your organization**

- Includes a Visual Studio sample application and a compiled HTML file describing each component's extensibility points and object model
- Export Extensibility allows developers to submit custom export jobs to KnowledgeLake ExportDeveloper support
- Create custom buttons and panels for programmatic interaction with the document and its metadata within the viewer

## The KnowledgeLake Family of Imaging and Capture Products

From the desktop to the enterprise, KnowledgeLake products help you maximize your SharePoint investment by speeding up how quickly you achieve ROI, lowering the total cost of ownership and increasing productivity for a complete enterprise content management solution.

The KnowledgeLake Capture Suite provides a comprehensive solution for managing the capture of your enterprise content using SharePoint. Capture all content whether it is from MFPs, desktops, production scanners or electronic documents.
