

# KnowledgeLake Migration

Migrate your Legacy Content to SharePoint®

## Product Overview.

The demand for migrations from legacy Enterprise Content Management (ECM) systems is rapidly growing as the Microsoft SharePoint® platform is becoming a standard for organizations that are seeking to maintain a centralized repository and are taking advantage of their existing technology investment in SharePoint®.

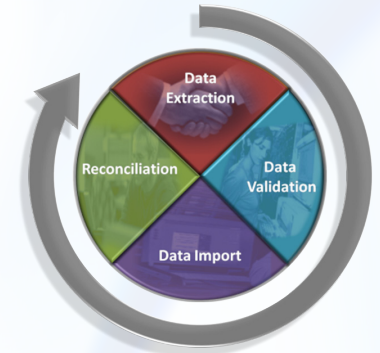

KnowledgeLake is a leading expert on migrating content from legacy ECM systems to SharePoint. KnowledgeLake follows a structured migration process that is proven and reliable. Included in this process is an ECM Migration Utility that was developed for products such as: IBM's FileNet, Xerox's DocuShare, Hyland's OnBase, EMC Documentum's ApplicationXtender and other legacy systems. The KnowledgeLake migration process and utility ensures that all content is migrated and tracked for auditing purposes.

- Planning & Validation
- Migration Design & Analysis
- KnowledgeLake Product Installation & Configuration
- SharePoint Consultation, Installation & Taxonomy Configuration
- Migration of Data To SharePoint
- Acceptance Testing and Production Support

### KnowledgeLake's ECM Migration Utility

KnowledgeLake's ECM migration utility facilitates the orderly migration of documents (including indexes) from legacy platforms. The migration utility provides the following functionality:

- Facilitates the orderly migration of documents and indexes from legacy document management/imaging platforms to SharePoint
- Leverages KnowledgeLake's core server technology for a seamless transaction
- Provides detailed auditing and validation for "each" migrated document
- Provides facility to scrub data and transform content file types
- Mapping of legacy data to SharePoint taxonomy

### Why Use KnowledgeLake's Services?

KnowledgeLake knows that your ECM content is vital to the success of your business. Let the ECM experts handle your migration so that you don't have to. Key benefits for you:

- A tool that is already developed; the speed of migration will save you money vs. in-house development and testing
- KnowledgeLake's migration utility is proven
- KnowledgeLake Professional Services has experts that specialize in migrating content from legacy ECM platforms to SharePoint
